Therefore, anyone reading this agreement agrees not to disclose any of the information provided during the internship without notifying & taking the employer's / supervisor's approval.

Internship title : Full-stack developer.

Company name : Makka.

Introduction:

The purpose of this report is to summarize and recap what I have learnt from three month internship program I took part of at Makka.

So this will help the SCAD office to evaluate the experience. The objective of this internship was to get us more familiar with the software development field specially the web development field, learn new software technologies, and prepare us for the future opportunities in the software development industry. This was done by providing us with a course about fullstack web development, making an e-commerce platform individually.

Company description :

Makka is a real-state company which was established in 1979 as a shareholding company. The company alsomake the industrial developer functions through developing the landscapes.

Internship preformed tasks :

The internship was divided into two periods .In the first period, the company provided us with a course. The course was about the fullstack web development using php laravel ,postgresSQL. In the second and the last period, we implemented an e-commerce platform using php laravel ,postgresSQL individually.

Internship evaluation:

In this internship I learned many new software technologies. The most useful technologies I have learnt are the laravel , Heroku deployment ,APIs ,postgresSQL and integrating them all to create a web app and deploy it using Heroku. Those technologies I did not learn during my studies and they gave me a more professional experience in the software developments field .This internship gave me a professional overview about the needs of the software development market , wided my scope for future career plans , and made me know more about my passion in the software developments and how to enhance my skills in the field. I am very satisfied with the internship and its benefits exceeded my expectations.

Conclusion:

In conclusion , makkka is a real state company which provided me with a three month internship in the web app development field .they provided us with a fullstack web development using laravel with postgresSQL course ,then we made one e-commerce platform using laravel ,and postgresSQL individual project.i am very satisfied with my experience and the software technologies that I learnt in this internship because those technologies helped me to get to know more about my software development passion and how to develop my skills to be ready to the market .
