

Internship Evaluation & Reporting

Thank you for taking the time to complete this form, this evaluation will be used to assess the student's participation in the internship program.

Supervisors, using the form below please evaluate the student who interned with your organization, institution, or business. You can fill out this form electronically or you can fill it manually but eventually it must be signed and stamped from the company's side.

Please note that part I & III should be completed by the intern, part II should be completed by the direct supervisor in the company.

Part I. GENERAL INFORMATION - STUDENT'S INPUT

Student Info:

Student Name: Antonymakram wahba GUC Student ID No.: 43-16239
Faculty: Engineering Major: Met/CS&A
Student Mobile No.: 012 2022 8833

Internship Info:

Company Name: NAT Software house
Core Industry/Business: Software/IT consulting Country: Egypt
Supervisor Name: ABDAI HAKIM Supervisor Job Title: internship supervisor / head of branch
Supervisor Tel. No.: N/A Supervisor Mobile No.: 0111 972 4954 012724 0035
Supervisor E-mail: hakim@egyptnet.com Training Department(s): Front end
Source of internships: (1) SCAD office (2) on my own (3) Referrals from GUC TA/Dr. (4) Recruitment website (5) others:
Work Place: (1) Organization (2) Head Office (3) Branch (4) Factory (5) Site (6) Others:
(2) Head Office other email: i.hakim@safedrivingnetwork.com

Part II. EVALUATION AND COMMENTS - DIRECT SUPERVISOR'S INPUT

Period of Internship (dd/mm/yyyy) From: 1/10/2021 To: 1/4/2022
Internship nature (Enrolment Status)
☒ Part time Please specify, no. of Days per week: 5 hours per day: 4
☐ Full time Please specify, no. of Days per week: _____ hours per day: _____

Company Stamp

Serial no. <u>Nile Technology & Advanced Solution</u> شركة النيل للتكنولوجيا والحلول المتقدمة ب.ض: 149704 746/162/205	SCAD Comment

This agreement is to acknowledge that the information provided by any company / organization during the internship is unique to this business and confidential.

Therefore, anyone reading this agreement agrees not to disclose any of the information provided during the internship without notifying & taking the employer's / supervisor's approval.

Internship Student Report

In this Reports I will be giving a brief but concise overview of the history of the company where I had my internship, the technologies and software I used, the skills I acquired from working in a software development company and the information I learned about certain frameworks and programming languages.

Nile Technology & Advanced Solutions or NAT for short, has been playing a significant role in the software development market. Since 1999 and through the last 8 years we have focused on the Tracking Technology Information and its solutions such as GIS solutions (Geographic System).

Nile Technology & Advanced Solutions Headquarters are in Cairo, Egypt with its branch is in R.A.K, U.A.E while it is development Centers are in both UAE and Cairo. The company's Mission is to provide robust, cost-effective, flexible, open, and reliable software solutions and services in the shortest period to our customers, and it is Vision is to be the market leader in Tracking Technology and provide the most reliable service in the region.

During my internship I was tasked with creating user friendly UI and UX elements and assisting in design decisions, in the first 2 weeks I was given training in the software and frameworks that the company used in its front-end such as VUE, which is an open-source front-end framework built on JavaScript for building professional user interfaces and single page applications plus a refresher course on HTML5 and CSS.

All company staff including interns would start the day by having a small five-minute meeting to catch up on what progress was done on assignments and other work flows afterwards we would break into groups such as a front-end team, a back-end team, and a hardware team for the GIS (Geographic Information System) modules that were developed in house and start working on the tasks assigned to us.

I have gained many skills from my internship and training such as a much greater working experience with HTML5 and CSS, how Software development works in the real-world, I gained time management skills by balancing assignments with college work and still meeting my deadlines for the assigned work, how a company of 40 employees spread over 2 countries can work together without any disruptions of service or being late to any commitments to customers, and finally I learned what a career in front end development and full stack development will be like which has educated my decision for my own career, overall my time in the company and the internship has been a very satisfactory and quite useful experience for my future since I plan to follow this career path.

To summarize during my time in the company I have Acquired enough experience to be quite proficient in designing front-end UIs and UXs that are user friendly while also being professional and high quality I also learned how to work in a team and how different interconnected teams work together without disrupting the work flow of each team, also I learned a lot about VUE.js and how it is used for certain functionality that is much more simplified than if it was implemented in other front-end languages.
