This agreement is to acknowledge that the information provided by any company / organization during the internship is unique to this business and confidential.

Therefore, anyone reading this agreement agrees not to disclose any of the information provided during the internship without notifying & taking the employer's / supervisor's approval.

Internship Report Geidea

Internship Title: Associate Product Owner / Business Analyst

Company/ Organization Name: Geidea Solutions

Introduction:

This report will cover an overview about my internship at Geidea Solutions. The main purpose of this internship was to gain experience in the financial technology sector, in addition to trying out several positions/roles to see what suites me best. I chose to intern in a financial technology (also called Fintech) company since the industry is booming and is currently in very high demand and has a very wide customer segment. In this report, we will start by talking about the company's description and what they do and then we will move on to the details and tasks performed during this internship.

Company / Organization Description: (Not less than 100 words)

Geidea Solutions is a financial technology company that was founded in 2008 in KSA. Geidea provides a variety of digital payment services, contributing to the goal of a cashless society. It has evolved into a leading service provider in the Point-of-Sale (POS) Terminals and Digital Banking industry, serving financial institutions and businesses in retail and digital commerce. Geidea's POS terminals accept payments made with all major debit and credit cards, such as Mada, MasterCard, Visa, UnionPay and American Express, as well as digital wallets such as Mada Pay and Apple Pay. Geidea supports small business and tries to empower merchants of all types and sizes by providing them with the tools they need to manage and grow their business. It makes payments and commerce technology very easy to use, accessible and affordable. Geidea recently launched in Egypt and is trying to work its way up to compete with big companies in the industry like Fawry, Paymob, and many more.

Internship Performed Tasks:

In this internship, not only was I given the opportunity to train as an associate product owner, but I also spent some time with project managers and business analysts. This has helped me broaden my mind to different aspects of how the company functions. I have attended a lot of meetings, starting with the requirements gathering meetings and onto the analysis and scrum meetings. I have witnessed and been part of how the agile system for software development works as I have been taught in my SE course at the university. I have also written a product backlog for a loyalty program that is yet going to be announced by the company. I was introduced to some of the CBE's (Central Bank of Egypt) regulations that concern running the Fintech business. I've been taught how to hunt for suitable clients and practiced sales pitches to get clients on board.

Internship Evaluation:

I have gained a lot of skills and definitely expanded my point of view in the 2 months I was at Geidea. I have gotten hands-on experience in several roles in the company (Product manager/Project manager/Business analyst) and I have seen how the business side works and fuses with the technology side in a company. The internship definitely exceeded my expectations and has helped me decide where I want to excel after graduating. I strongly believe that the activities that I carried out in this internship are strongly correlated with what I study because it's a company that relies massively on technology and software to provide its services to the clients. I think the most related courses were the ones relating to software development and front/back-end app development.

Conclusion: (Not less than 100 words) (A summary of key conclusions derived from the internship experience. general observations about the sector in which your internship company/institution operates)

In conclusion, I am very happy with the experience I have gained at Geidea Solutions. The staff were super helpful and tried to include me in multiple areas of their work. For me, the financial technology sector is definitely worth considering after graduating. It's a booming field

with a lot of potential and I would definitely love to be a part of it. I have learned about payment gateways, POS systems, Merchants and Vendors, Digital commerce and many more topics. I have also applied the content I learned about in my software engineering courses on real-life applications that are to be implemented by the company.

geidea

Certificate of Excellence

This Certificate is awarded to

Amr Hesham El Sayed .

For Successfully Completing Geidea's internship program .
Starting from 1st of August till 31th of September 2021 in the
Technology Department .

Ahmed Nader

Geidea Egypt General Manager
