

Internship Evaluation & Reporting

Thank you for taking the time to complete this form, this evaluation will be used to assess the student's participation in the internship program.

Supervisors, using the form below please evaluate the student who interned with your organization, institution, or business. You can fill out this form electronically or you can fill it manually but eventually it must be signed and stamped from the company's side.

Please note that part I & III should be completed by the intern, part II should be completed by the direct supervisor in the company.

Part I. GENERAL INFORMATION – STUDENT'S INPUT

Student Info:

Student Name: Amro Gamal

GUC Student ID No.: 43-15032

Faculty: Engineering

Major: Media Engineering & Technology/CSEN

Student Mobile No.: 01091712453

Internship Info:

Company Name: Remotify

Core Industry/Business: Mobile App Development

Country: Egypt

Supervisor Name: Ahmed Ali

Supervisor Job Title: Team Leader

Supervisor Tel. No.:

Supervisor Mobile No.: 01066723845

Supervisor E-mail: ahmed@remotifyapp.com

Training Department(s): Mobile Development

Source of internships: (2) on my own

Work Place: Others: Remotely

Part II. EVALUATION AND COMMENTS – DIRECT SUPERVISOR'S INPUT

Period of Internship

(dd/mm/yyyy)

(dd/mm/yyyy)

From: 15/06/2021

To: 28/09/2021

Internship nature (Enrollment Status)

☐ Part time Please specify, no. of Days per week: _____ hours per day : _____

☒ Full time Please specify, no. of Days per week: 5 hours per day : 8

Company Stamp

Ahmed

General Comments & Recommendations: (kindly mention intern potentials, areas of further development or technical constraints encountered during the internship period)

Amr is a highly proficient student, he knows how work in various parts of development and integrate them together, he only needs to improve his communication skills and he will be very efficient. It's been a pleasure working with Amr and I wish him the best in his future endeavors.

Yes **No** **Maybe**

Do you think similar candidates would fit in the Organization culture and qualify for job needs?

Part III. INTERNSHIP REPORT – STUDENT’S INPUT

- This report has to be prepared by the student, it must be prepared and written in a **computerized** format, submitting the report in hand written format will not be accepted.
- Kindly refer to the Internship Report writing Guidelines on the GUC intranet – SCAD office folder.
- This report will be reviewed and evaluated from internal faculty members.

Internship Title: _____

Company / Organization Name: _____

Introduction: (Not less than 100 words) (should depict the main purpose of the report, covering the objective out of performing this internship in this industry/company specifically then cover the outline for the report’s structure)

Company / Organization Description: (Not less than 100 words)

Internship Performed Tasks: (Not less than 100 words)

Internship Evaluation: (Not less than 100 words) (This section should answer the following questions in the form of a paragraph)

What skills do you think that you have gained from the internship? Did the internship meet your expectations? If not, please explain why? How do you think the internship will influence your future career plans? How do you think the internship activities that you carried out are correlated with your studies? Which of the academic courses that you have taken in GUC were the most related to your internship?

Conclusion: (Not less than 100 words) (A summary of key conclusions derived from the internship experience. general observations about the sector in which your internship company/institution operates)

Please rate your satisfaction with the internship experience.

☒ Very satisfied ☐ Somehow satisfied ☐ Neutral ☐ Somehow dissatisfied ☐ Very dissatisfied

Would you recommend this internship to other colleagues?

☒ Yes ☐ No ☐ Maybe

Disclosure / Confidentiality Agreement

This agreement is to acknowledge that the information provided by any company / organization during the internship is unique to this business and confidential.

Therefore, anyone reading this agreement agrees not to disclose any of the information provided during the internship without notifying & taking the employer’s / supervisor’s approval.

Internship in Mobile App Development

Remotify

Mobile app development has been one of the trendiest markets for the past 11 years, thousands of apps exist in both the Play Store and App Store for the IOS, making apps was the top priority on my checklist for me to learn and perhaps use it as a career path in the future. I got the opportunity to intern for Remotify which makes apps that interact with your Personal Computers. In this report I will highlight my 3-month experience in this internship, I will first start by giving a brief overview of the company, its mission and how the company operates using its interns. Then, I will give an explanation on the kinds of tasks I did while working in this company, and in the end, I will give an evaluation of my experience in working in Remotify!

Remotify which was previously known as Lazy Mouse is a startup company founded in 2015 that develops apps using the new framework known as Flutter made by Google that can interact with your personal computers!

The current main mission of this company is to be able to finish a working build for the rebranded lazy mouse app that essentially controls your personal computer having several different functionalities, after finishing the app there is plans to establish more apps with various different functionalities.

New interns including me worked hybrid(office/remotely) along with the development team for 5 days a week and 8 hours per day, meetings were essentially done weekly to present new work to be done and to showcase previous work to the development team.

For the first month of the internship, we were given a 2-week window to essentially learn the basics about flutter and create very basic apps to be familiar with it. Then for the rest of the month, we alternated between teams by creating simple tasks in flutter just to get familiar with each other.

For the remainder of the internship is where the main work begins, we were divided into teams and each team of interns that was made, along

with part of the main development team created the various functionalities like (File sharing, homepage design, etc..) for the app, I was in charge of accessing the files from the PC and showcasing it on the phone, to be able to first fetch those files on the app from the pc I made the functionality using Dart which is considered to be the Back-End part, then to view those files in readable and viewable format I made various design elements called stateful widgets; stateful meaning it essentially change with real time data to match the fetched files and give them a look.

Lastly I paired the widgets with the functionality of fetching files I made in Dart and that is to finish the file viewing part of the app I was mainly in charge with.

After doing each functionality of the app we present it to our assigned development team member, those functionalities go through extensive reviews and then we are given feedback.

We then gathered up as a team all, integrated the different parts of the app that we did and grouped them together to make a mock of the Remotify app, and finally we compare our work with other teams in the internship.

I went into this internship, having 0 experience in both flutter and working in a different environment with many different personalities.

I was able to test my limits on how fast I could pick up flutter and I was very proud with how fast I picked it up and used it efficiently. I learned how to communicate with new people and got the opportunity to see how the different minds think things through. I also learned how to integrate and synchronize our work together using GitHub! This internship definitely exceeded my expectations and I definitely will recommend people I know to at least experience this.

Mobile development is something completely new to me and I got to learn it from scratch however I did get a designing experience from the SE course I took in the 6th semester. I also definitely had some experience with communicating with different team members through the projects we were tasked with in our studies in the GUC. This internship really shed a light on how fun designing mobile apps is using Flutter and this is definitely one of the top priorities of career paths I want to pursue in the future after finishing my studies

To conclude, I got a really good opportunity to learn Flutter for mobile development since it was a top priority on my list. Not only was I able to learn Flutter from scratch, I was able to develop my self learning skills, I also got to know new very amazing people and I was able to develop my social skills further. My experience in working in Remotify was very nice and it exceeded my expectations in working in a company environment and it will definitely influence my future career paths and perhaps look further into working as an app developer.

Appendix:

This is the file viewing portion of the app that I had a hands-on experience of working on.
