

Internship Report

By: Omar Khaled Sayed Ismail

ID: 46-1152

Description of organization:

- CompuMagic is a company that has existed for many years in the Egyptian market. Started as a startup a few years ago and now the firm is working up it's way and expanding in the market. Headquarters in Nasr city, Compumagic is an organization that provides not only hardware products for PCs, laptops and electronics but also provides software assistance in multiple fields and acts as an outsource for developing programs and applications to multiple firms.

Internship Activities:

- The first month was a monitoring task of the company's database. The company used oracle database and by the help of the company's specialists I was able to learn new SQL queries and publish reports using results of the required tasks from the acquired values from the database.
- My tasks during this month were to monitor the databases load and traffic and provide constant feedback to supervisors. Moreover, my supervisors gave me another task of trying to code SQL queries in order to obtain results required for reporting and then my supervisors would correct my mistakes if any.
- My task during the second month was to work alongside a team of interns for some adjustments to the company's website in which is still under development and yet to be launched. We worked under the supervision of a professional web developer who instructed us in multiple fields including nodeJS and other engines. A step by step sequence to work together in developing a well-constructed website by the end of the internship period.
- First month software was mainly Visual studio

- Second Month was VsCode which was used as IDE for the website code Frontend and backend.

Internship Evaluation:

- very friendly staff and employees that are willing to guide you through your given tasks daily.
- On a normal day the atmosphere is calm and encourages learning new skills and offers suitable climate for efficiency and productivity.
- I personally gained lots of technical related skills in my field of study
- Enhanced my knowledge in database management and web development.
- I developed my soft skills and gained lots of office experience.
- The internship exceeded my expectations I was worried for the fact that I may not gain lots of experience giving the length of the internship but that wasn't the case.
- This internship would definitely help me in my career as it will benefit me in my CV and personal knowledge and skills.
- The tasks performed were related to my field of study.
- Courses related to my internship were Databases 1 / 2 and also ACL (Advanced computer lab)
- I would definitely recommend the firm to fellow colleagues.

Conclusions:

Internship experience was amazing. I got to make some new friends and not only develop my skills but also have fun doing so.

However, the working space was not very suitable for the number of interns as it wasn't very spacious and accommodating.

Finally, the company has a very bright future ahead of them in both areas software and hardware.
