

Internship Evaluation & Reporting

Thank you for taking the time to complete this form, this evaluation will be used to assess the student's participation in the internship program.

Supervisors, using the form below please evaluate the student who interned with your organization, institution, or business. You can fill out this form electronically or you can fill it manually but eventually it must be signed and stamped from the company's side.

Please note that part I & III should be completed by the intern, part II should be completed by the direct supervisor in the company.

Part I. GENERAL INFORMATION – STUDENT'S INPUT

Student Info:

Student Name: Youssef Ashraf Shaarawy GUC Student ID No.: 43-3973

Faculty: MET Major: Computer Science

Student Mobile No.: + 201201553355

Internship Info:

Company Name: Klickit Digital Payment

Core Industry/Business: Financial Technology Country: Egypt

Supervisor Name: Saeed Talaat Supervisor Job Title: CEO

Supervisor Tel. No.: _____ Supervisor Mobile No.: 01001700010

Supervisor E-mail: saeedt@qlesseg.com Training Department(s): Technical

Source of internships: (5) others: Referral

Work Place: Remote

Part II. EVALUATION AND COMMENTS – DIRECT SUPERVISOR'S INPUT

Period of Internship (dd/mm/yyyy)
From: 07 / 11 / 2021 **To:** 22 / 12 / 2021

Internship nature (Enrollment Status)

Part time Please specify, no. of Days per week: 5 hours per day : 4
 Full time Please specify, no. of Days per week: _____ hours per day : _____

Part III. INTERNSHIP REPORT – STUDENT'S INPUT

- This report has to be prepared by the student, it must be prepared and written in a computerized format, submitting the report in hand written format will not be accepted.
- Kindly refer to the Internship Report writing Guidelines on the GUC intranet – SCAD office folder.
- This report will be reviewed and evaluated from internal faculty members.

Internship Title: Software Engineer

Company / Organization Name: Klickit Digital Payment

Introduction: (Not less than 100 words) (should depict the main purpose of the report, covering the objective out of performing this internship in this industry/company specifically then cover the outline for the report's structure)

I am writing this report in order to introduce and summarize the internship I did at Klickit Digital Payment. The main objective of performing this internship was to gain experience in a working environment, where I can get experience of the working conditions in the industry. The body of this report is split into three paragraphs. The first of these paragraphs introduces the company, its departments and the services they provide, followed by a brief summary of their vision, missions and values. The second paragraph presents all the tasks I did at the company while working there. The third body paragraph is an insight of my time at the company and what I learned working there. The final paragraph of the report summarizes the key conclusions I have from my experience there.

Company / Organization Description: (Not less than 100 words)

KlickIt Digital Payment, formerly Q less Solutions, is an innovative software development company that specially focuses on payment processing solutions for educational organizations. The company helps these organizations evolve in order to keep up with the current internet age by providing them with advanced solutions and acting as intermediaries for their payment methods. The company creates an intermediary payment service for each organization that combines famous payment methods and systems like Orange Money, Meeza, Fawry, Visa, MasterCard. The mission of the company is to facilitate the financial transactions of educational businesses to create a breakthrough in the way payment and financial transactions are performed everywhere. The company started in Egypt but has begun to accrue international customers from all around the world.

Internship Performed Tasks: (Not less than 100 words)

The first week of the internship included online sessions about JavaScript and we were given mini tasks such as creating mini-games or timers to complete in order to test how much we understood. In the second week, a similar schedule to the previous week was followed but this time, it was for .NET sessions. Then for the third week, we were shown how the company-provided solutions processed payments, and how the contents of the network requests were encrypted in order to prevent theft of information and provide secure authentication. We reviewed several of these solutions provided to different organizations according to their use and how they integrated several APIs of the famous payment systems into their own system. Finally, we were shown how their own APIs worked and how they were provided to the educational organizations and what inputs they expected and what outputs they produced. For the final two weeks, we were split into groups and each group had to deal with a certain payment provider and integrate their system into the company's system and deal with several issues concerning the unification of the two platforms. My group was given the Meeza service.

Internship Evaluation: (Not less than 100 words) (This section should answer the following questions in the form of a paragraph)

What skills do you think that you have gained from the internship? Did the internship meet your expectations? If not, please explain why? How do you think the internship will influence your future career plans? How do you think the internship activities that you carried out are correlated with your studies? Which of the academic courses that you have taken in GUC were the most related to your internship?

This internship was very fun. I gained a lot of experience in several fields I had no knowledge about. I gained a lot of knowledge about the security of the payment systems and what methods they used to authenticate the exchanged information in order to prevent theft. I also learned a lot about APIs and how they can be well-integrated together to form a fully functioning system that can work together flawlessly. In addition, I gained a lot of useful experience in the software development world, especially in the last part of the internship when we had to sit down with employees from Meeza. I learned from that a lot about project organization and how to divide sprints and user stories into smaller tasks, in order to evaluate my progression. Also, The Software Engineering course I took contained important information related to this topic, but unfortunately it was during the covid pandemic, so being able to revisit that information and apply it practically was greatly benefitting.

Conclusion: (Not less than 100 words) (A summary of key conclusions derived from the internship experience. general observations about the sector in which your internship company/institution operates)

To conclude this report, performing this internship was very useful to me and for my future plans. I gained a lot of experience, especially by working in a field that is increasingly expanding and quickly evolving with many interesting and different technologies. I used new technologies that I haven't used before, which I enjoyed very much. Some of them would have been really useful to me if I had known them prior to some of the projects I developed at college and I still use after finishing the internship. Also, it was nice working with other people who I have never met before and forming new relationships with them. The company works in a very promising field which helps make different companies having different objectives achieve these objectives and work better together. My mentor and senior developer was extremely helpful. His guidance and insight were crucial in this internship and will leave a big mark on my future career.

Please rate your satisfaction with the internship experience.

Very satisfied Somehow satisfied Neutral Somehow dissatisfied Very dissatisfied

Would you recommend this internship to other colleagues?

Yes No Maybe
