Part III. INTERNSHIP REPORT – STUDENT'S INPUT

– This report has to be prepared by the student, it must be prepared and written in a **computerized** format, submitting the report in hand written format will not be accepted.
– Kindly refer to the Internship Report writing Guidelines on the GUC intranet – SCAD office folder.
– This report will be reviewed and evaluated from internal faculty members.

Internship Title: Full stack software development

Company / Organization Name: Lyra Analytics

Introduction: This report Aims to give an over view of the held internship at SBS-KSA . The objective of this internship was to enhance both my technical and communication skills , And to introduce myself to a new business model which is outsourcing. The nature of the company as a startup allowed for rapid experience gain both from a technical perspective and in my soft skills . This report will include an overview of the following. First the organization description, the performed tasks within the company , an evaluation of the internship and finally a conclusion .

Company / Organization Description: SBS is a startup at the time of the internship so the scale of the team was not large . team at that time did not exceed 20 people . SBS is a multi-national company originated in KSA and it has a new branch in egypt , The company dose many projects but mainly Fintech/Business solution software provider .
The main Product that is develped is a fintech applocation called SOFT-POS that is a replacement for the traditional payment methods , replacing the Point of sale that we are used to see in every shop / merchant with a smarter yet smaller and portable solution that could be used by any mobile phone . The company is not so old in Egypt , about one and half years old . And Luckly I was one of the first to join the team.

Internship Performed Tasks: Tasks I performed at SBS could be categorized under full-stack development. To start ,The first part was to build a front end administrative module to control the application . As mentioned in the introduction it's a fintech application so we handle a lot of Merchants and these merchants have outlets and users each outlet accepts payments so all the functionalities from viewing/editing/updating was managed through two portals one for merchants and another for admins to control the merchants under it's supervision . After the portal development I changed my scope to Back-end development using Java spring boot / tasks included API designing / Back-end logic development and testing . Further tasks related to React and Java were given during my internship period

Internship Evaluation: Skills gained from this internship could be summarized in the following . Technical skills in react , javascript , Java Spring boot, Sql database , Docker ,Apis integration , and for the soft skills most of them was new to me as it was my first time to work in an agile work environment and being introduced to new terminologies like scrum , stand-up meeting . This knowledge was really useful further on to adapt to the new working standards . Which I find really useful for the market right now , and for future job offers . The coursed I found most useful during the internship were database 1 and 2 coursed and all CS courses and ACL lab.

Conclusion: In conclusion, this internship has been a very useful experience for me. I can safely say that my understanding of the job environment has increased greatly ,also increased understanding of the nature of software project and specially startup projects and work environment ,Furthermore working within agile environment really increases the teamwork aspect and encourages fast deployment . However, I do think that there are some aspects of the job that I could have done better and that I need to work on. I need to do more effort in applying correct communication principles .

Please rate your satisfaction with the internship experience.

☑ Very satisfied ☐ Somehow satisfied ☐ Neutral ☐ Somehow dissatisfied ☐ Very dissatisfied

Would you recommend this internship to other colleagues?

☑ Yes ☐ No ☐ Maybe
