Part III. INTERNSHIP REPORT – STUDENT'S INPUT

- This report has to be prepared by the student, it must be prepared and written in a **computerized** format, submitting the report in hand written format will not be accepted.
- Kindly refer to the Internship Report writing Guidelines on the GUC intranet – SCAD office folder.
- This report will be reviewed and evaluated from internal faculty members.

Internship Title: IPMagiX Internship program

Company / Organization Name: IPMagiX

Introduction:

This report will cover the details of the Internship at IPMagiX in the field of web development technology, I have always wanted to take part in a real life web development projects and interact with clients in order to gain practical experience that's crucial to one's career, this internship gave me this opportunity.

My aim through this internship was to apply the theoretical knowledge I have from my academic and my extracurricular studies in this field. The report introduces a brief introduction about the company and carries out information about the structure of the internship program about the duties and tasks performed during the period of the internship along with describing the roles taken. In conclusion, the internship had key learners that will be included in this report.

Company / Organization Description:

IPMagiX has been developing innovative technologies for clients for more than 20 years to help them increase their productivity and optimize their performance through mobility solutions, IPTV services and IP telephony Products. IPMagiX help organizations communicate anywhere, anytime, and through the platform they choose with innovative, customizable applications and solutions. IPMagiX's experts work hands-on with clients to identify their individual needs, design a customized plan, and develop unique solutions to fulfil their business objectives. Their smart solutions include customizable mobile apps with features like messaging, indoor location-based services, payment gateways integration, virtual tours among other services developed on demand as per the client's needs.

Internship Performed Tasks:

I had the internship at the company's office, I was at the company's office daily from 9 am till 5 pm. During my internship experience with IPMagiX, I was able to gain my knowledge through the required tasks. The tasks were working on a company's internal HR tool. I worked under the supervision of the front-end team under the development process of agile (process of how tasks are distributed) besides by end of each week, we had a planned meeting with my mentors discussing my approach giving me feedback and best practices in the market.

I learned through the internship enhancing my knowledge in Web development.
From the main tasks we performed:
1. Work with HTML and CSS.
2. Developing an external API in backend.
3. Dealing with React Framework in frontend.
4. Worked with a library in React named Redux to improve tool content.

4

5. Learn new build tools and the participating in the decision making on which tools will be used in certain tasks.
6. Reach better performance by learning new Techniques make web pages more optimized.
7. Shadowing front-end team members while dealing with reviewing some client's website concerning the overall look and design of a website.

Internship Evaluation:

This internship experience definitely helped me understand more about the work environment and business world. I expanded my horizon beyond Web development. There were certain courses in my academic curriculum that added value to my knowledge in this specific internship. The courses were "CSEN101": "Introduction to Computer Science"," CSEN102": "Introduction to Computer programming" ,"CSEN 301": Data Structures and Algorithms", "CSEN 504":"Data bases I","CSEN 604":"Data bases II","CSEN 603":"Software Engineering", and "CSEN 704":"Advanced Computer Lab" was a great prerequisite to get my hands on how to program useful programming functions. I was definitely impressed learning about the business side, talking to clients and presenting my work on a weekly basis to my mentors. I gained more confidence in my presentation skills and being challenged out of my comfort zone.

Conclusion:

In conclusion, this internship had me exposed to a whole new world on different levels.
I got to see how a multinational process works in real life - not only in theory. I had the opportunity to work in a diverse team of professionals and other interns from a different academic background. Hence the internship, I got to see how different functions and tracks work in harmony and complete each other. The program was a well-rounded experience and made the interns exposed to the technology, business and marketing side. This was definitely the start to a great career path in such a wide field as web development. I am looking forward to expanding my knowledge in this field through my studies.

Please rate your satisfaction with the internship experience.

X Very satisfied ☐ Somehow satisfied ☐ Neutral ☐ Somehow dissatisfied ☐ Very dissatisfied

Would you recommend this internship to other colleagues?

X Yes ☐ No ☐ Maybe
