General Comments & Recommendations: (kindly mention intern potentials, areas of further development or technical constraints encountered during the internship period)

Mahmoud has a lot of potential when it comes to building software and educating people. I believe he will add a lot of value to the WorkOS team

Part III. INTERNSHIP REPORT – STUDENT'S INPUT
- This report has to be prepared by the student, it must be prepared and written in a **computerized** format, submitting the report in hand written format will not be accepted.
- Kindly refer to the Internship Report writing Guidelines on the GUC intranet – SCAD office folder.
- This report will be reviewed and evaluated from internal faculty members.

Internship Title: Developer Advocate

Company / Organization Name: WorkOS

Introduction: (Not less than 100 words) (should depict the main purpose of the report, covering the objective out of performing this internship in this industry/company specifically then cover the outline for the report's structure)

Company / Organization Description: (Not less than 100 words)

WorkOS is a platform for developers which enables them to make their apps enterprise-ready. This is done by providing pre-built features and APIs. Currently, the platform supports the following APIs:

- Single-Sign-On: allowing users to authenticate using an Identity Provider i.e Okta, Google, Azure, etc.)

- Directory Sync: allowing users to link a directory of employees and have real-time changes

- Multi-factor Authentication (MFA): API that makes it easy to set up multiple authentication factors. Such as SMS verification, WebAuthn, and Time-based one-time password (TOTP)

- Audit trail: allows IT admins to view real-time changes as they happen in an application

All of these features are essential to support enterprise customers and for making apps more secure.

Internship Performed Tasks: (Not less than 100 words)

During the three months I worked on the following tasks:

- Familiarizing myself with WorkOS APIs and learning how to use them to add Single Sign-On, Directory Sync, and MFA

- Creating educational content that raises awareness about the product. This includes videos and blog posts.

- Contribute to WorkOS' quarterly customer event. During this event, the company shares updates about the latest new features that are being added to the platform.

- Help with raising awareness on different social media platforms and speak at events geared towards developers.

- Improve the user experience by doing frequent audits and reporting feedback to engineers

- Contribute to the Developer Documentation and make sure it' 's up to date and easy to follow

Student Career & Alumni Development Office. scad@guc.edu.eg **| German University in Cairo** New Cairo City - Main Entrance Al Tagamoa Al Khames; Egypt

Internship Evaluation: (Not less than 100 words) (This section should answer the following questions in the form of a paragraph)

What skills do you think that you have gained from the internship? Did the internship meet your expectations? If not, please explain why? How do you think the internship will influence your future career plans? How do you think the internship activities that you carried out are correlated with your studies? Which of the academic courses that you have taken in GUC were the most related to your internship?

During these 3 months, I learned how to define the scope of a project, how to effectively communicate with other developers, how to use a project management tool (Linear) and how to write clear documentation. Furthermore, I became a better developer because I worked with other developers who were more experienced than I am. The experience made me sure that I'd like to pursue a career in developer education. I believe that this is a field with a lot of demand and potential. I would definitely say that the experience exceeded my expectations, I was surrounded by great developers, designers, and managers who were very helpful.
The work experience is somewhat related to my studies; however, courses focus on the theoretical aspect of software development more than the practical one.

Conclusion: (Not less than 100 words) (A summary of key conclusions derived from the internship experience. general observations about the sector in which your internship company/institution operates)

Knowing how to collaborate and communicate effectively is key to one's success. Also, having a sense of ownership is very important! Treating the product as if it's my own makes working on it much more fun because now I care about how it's performing, and I want to make it the best version possible.
The company operates in the Software as a Service business (SaaS), they offer a subscription-based model when you want to use their Software. What's very interesting about the business model is that grows with customers. So more successful a customer becomes, the more money the company makes. I am definitely planning on working at WorkOS after graduating because I want to see how much it can grow as a company.

Please rate your satisfaction with the internship experience.

✓ Very satisfied ☐ Somehow satisfied ☐ Neutral ☐ Somehow dissatisfied ☐ Very dissatisfied

Would you recommend this internship to other colleagues?

✓ Yes ☐ No ☐ Maybe
